## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams (2808189). Williams teaches a support structure having an elongated member having first and second sides. The first side having a plurality of rib sections (each section is shown in the left side of the cross section 4-4), with each section having alternating series of arches and depressions 103. The second side includes having a plurality of a plurality of rib sections with alternating series of peaks 113 and depressions 109. it is noted that peaks 113 is offset from points 107 of the first side.

Regarding claim 3, note the land portion at 107.

Regarding claim 5, note the pulp material in col.2, line 53.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Williams (2808189) in view of Comer (4942965). Williams meets all claimed limitations except for the

cavities on the land portions. Comer teaches that it is known in the art to provide cavities 77 on the land portions 76 as shown in Fig. 9-10. It would have been obvious to one of ordinary skill in the art to provide cavities in Williams as taught by Comer to provide cushioning effects.
